

Hardwick Studio – architectural intern position

Fall, 2016

Hardwick Studio is seeking an undergraduate or graduate student for part time work during the academic year, transitioning to 30 hours a week over the summer. Hardwick Studio is primarily a residential full service architectural firm with a large client base all over the DC metropolitan area. We specialize in sustainable design and create unique projects for our clients.

This is a great opportunity for a motivated student who wants to learn the full gamut of residential design. An applicant will work on schematic designs, detailing, technical drawings, production and permitting. In addition, we are in the process of updating our website and promotional material.

Applicant should be willing to commit through the 2017 academic year. We currently use Autocad, Adobe Suite, and Microsoft Office software and are testing out moving to Archi Cad. Graphic design and computer literacy are always a plus, especially operating knowledge of Autocad and Archi Cad. Initiative, attention to detail, and reliability are key.

Compensation is based on skill level with the ability to rapidly increase as work product gets more advanced. Flexible but regular hours preferred. Willing to supervise for Independent Credit, NCARB hours, and LEED hours.

Please contact Gay Hardwick for more information.
