

## LIGHTING DESIGN CAD INTERNSHIP FOR HINSON DESIGN GROUP, LLC

Looking for an exciting opportunity to work with premier DC Architects and learn hands on about lighting design? Voted Best Architectural Lighting Design Firm by Home & Design Magazine, Hinson Design Group, LLC, based in Washington, DC, adjacent to Catholic University is seeking a CAD Intern. We are one of the rare Lighting Design firms offering turnkey customer solutions from concept to construction to commissioning. We are seeking an ambitious, bright star to help illuminate our practice. As an intern, you can gain experience in architecture, lighting design and construction segments.

We recognize that good lighting makes a building look and work the way the architect intended at all hours of day and night. It contributes to the character, to the desired attitude toward form and space, and to the effective functioning of that space. Lighting is dynamic. Change the lighting and the world around us changes.

### Job Description:

Lighting Design Intern is an early-level position. Lighting Design Interns act as support staff for our design team, drafting lighting plans, tracking materials in the library, providing documentation support and keeping the team informed of upcoming deadlines and deliverables. The position requires a background in lighting, interior design, architecture or a related field. Primary focus is on CAD plan entry from multiple sources, development of RCP layers, integrating elevations and cleaning up plans to deliver a client ready presentation.

### Position:

This is a part-time position that will begin upon approval of the internship. We can work around your school schedule. This individual should be well-organized, meticulous in detail, energetic, and must be able to work as a team and/or independently. A design or architectural background or experience is preferred. The intern must be dependable, honest, hard-working and must be able to multi-task.

### Computer Capabilities:

Individual applying must have fluent experience with Auto CAD, Microsoft Office (Word, Excel, PowerPoint), and Adobe Suite CS4 (Photoshop, InDesign, Illustrator). 3D modeling and rendering a plus.

### Summary of Requirements:

Help senior designer prepare client deliverables assisting in CAD plan input, manipulation and presentation of client ready output.

Work well within a team structure, supporting staff with enthusiasm and direction.

Proven skill with AUTOCAD, Illustrator, Photoshop and other drawing software.

Manage organization of the catalog library.

Manage entries in Smartsheet to track and manage project progress.

Show interest in lighting industry and willingness to attend educational seminars.
