

## Hoffmann Architects

Hoffmann Architects is looking for full-time summer employee to help with our drafting load, with an eye to someone who can fit in well with our team going forward. We are an Autocad shop, so experience with that platform is preferred.

Hoffmann Architects is a firm that focuses on the envelope of existing structures. In our DC office, this has given us the opportunity to work on a variety of high-profile buildings, both historical and recent. It's an excellent environment for anyone who is interested in the physical and practical side of architecture, as we do a wide variety of hands-on investigation and contract administration.

Interested applicants can contact J. Christopher Clements via email [c.clements@hoffarch.com](mailto:c.clements@hoffarch.com) or by phone at [703 253-9810](tel:7032539810).
